DESIGN DIVISION

The endless cycle of change in business calls for new styles and designs in "Chairs for All Business"—at the same time, however, there are certain chair styles which vary little through the years—since they continue to meet the basic needs of our customers.

We keep ourselves alert to changes—and maintain a corresponding alertness to the need for new chair designs that will keep pace with the development of new office furniture.

In this catalog you will find new *Boling* chairs along with other chairs for which there is a widespread demand. Our customers can be assured that all patterns shown are designed and manufactured for comfortable seating—are styled correctly and represent the utmost in durability and sound value as dictated by the experience gained from forty-six years of chair manufacturing *plus* a willingness to meet change with improvements in plant facilities and manufacturing procedures.

Catalog No. 50

**HIGH POINT BENDING & CHAIR CO.**

Our new Executive Posture Chair was designed for Executives who want the very finest. We've given it startling eye-appeal with luxurious Goodall covering, expertly tailored to blend with top grain leather and the warm finish of selected woods.

It is unbelievably comfortable . . . providing effortless relaxation at any tilting position. This is made possible by the new "Balanced-Ease" executive posture chair control. Features: no springs . . . foam rubber on seat, back and arms, molded to fit the body. Coordinated action of seat and back retains correct angle for maximum comfort in all positions. Choice of colors in expertly tailored top grain leathers with Gros Point fabrics by Goodall. Correct, comfortable seating assured for any individual by easy and simple adjustments of the posture mechanism.

HIGH POINT BENDING &amp; CHAIR COMPANY

## Chairs and Sofas Upholstered in Genuine Leather

Good looks and comfort plus long service in offices, lounges, reception rooms, lobbies, and clubs are afforded by this series of chairs and sofas. Durability is assured by heavy-duty frames made of hardwood with double spiral dowel construction and heavy corner blocks securely glued and screwed. Arms are bolted to frame for extra strength. Deep coil springs securely tied and fastened to a fully webbed base are used for added comfort and longer life.
